

## welcome

ORGAINVENT is the largest German labelling organisation in the beef sector. In addition to this officially approved labelling system, we also provide voluntary proof of origin for pork and poultry meats. Information about this can be found in the "**Labelling Systems / Traceability**" section.

ORGAINVENT continues to act as a coordinator for agricultural businesses in the QS System. With us, all product types can be coordinated. You can find further information in the "**QS-Coordination**" section.
